Prince Pu Lun Intimates That Chinese Neutrality Won't Last.

INT DIRECT WIRE TO THE TIMES. CHICAGO, May 15.-[Exclusive Dispatch.] "Neutrality has been China's policy and, despite all reports, China has been neutral so far in the war," said Prince Pu Lun, imperial Chinese commissioner to the St. Louis exposition, today. "But in the near future China may have to assume a part. I cannot too much admire the bravery, the endugance, the skill and the daring of the Japanese. They must be daring, indeed," he said, "to have attacked a nation with such colossal resources as Russia and such myriads of

# RUSSIANS CRIPPLE JAPANESE CRUISER.

Bold Exploit of Clever Young Naval Officer and Three Jackies.

Big Warship Badly Disabled by Torpedo Fired from Small Naptha Launch-Spirits of Russians Afloat and Ashore Raised by the Heroic Achievement-Port Arthur Situation Unchanged.

[BY THE ASSOCIATED PRESS-P.M.]

IAO YANG, May 14 - [Delayed in Transmission.] The Russian fleet scored its first distinct maval specess of the war on May 10, by torpedoing and crippling, though not sinking, an armored Japanese cruiser in Talienwan Bay.

The Russian attack was carefully planned on May 10, while the Japanese squadron was concentrated outside Dalny, devoting its whole attention to Talienwan Bay, and was carried out the same night.

The attacking force was not a regular torpedo boat, but was only a small naphtha launch in command of a young naval officer who had with him three jackies. The launch mounted a small machine gun and carried three torpedoes

When darkness fell the launch crept out of Port Arthur, huging the shore with no lights aboard. It was late when she gained the outer line of the Japanese squadron. Slipping through the torpedo boat pickets and selecting the nearest warship, a big-armored cruiser, she stole toward her and succeeded in exploding against her side a single torpedo.

Immediately flames enveloped the cruiser, which evidently was badly crippled.

The crew of the cruiser was seen to be fighting the fire which they at last succeeded in extinguishing. A sister ship took the damaged vessel in tow and disappeared to the southeast. The launch escaped the hot fire directed against her by the

apanese ships, but was unable to return to Port Arthur. Only a few of the higher officers were aware of the plan. The

hievement raised the spirits of the Russians afloat and ashore and the young officer who was the hero of the exploit, was feted recommended for the cross of St. George.

The Russians on May 11, apprehending that the pre-

Japanese squadron meant an attempt to capture Dalny, blew up the piers and evacuated the place. Two thousand Japanese have reoccupied the road to Sanchil-

ipu, again cutting off Port Arthur. A strong force is advancing against Polandien. SITUATION AT. PORT ARTHUR.

ST. PETERSBURG, May 15.—The Emperor has ollowing report from Viceroy Alexieff, dated May 14:

"I beg respectfully to communicate to your majesty from Rear-Admiral Wittesoeft, on the state of affairs at Port Arthur from May 6 to May 12. The report was brought by express runner from Dachichao Station on the evening of the second interruption of communication by the enemy. It follows:

"During an examination of the roadstead at the spot wher the battleship Pobieda was damaged by a mine, we found one of the enemy's defense mines which had been exploded by the force of the hurricane.""

JAPANESE ADVANCE GUARD. (BY THE ASSOCIA TED PRESS-P.M.1

ST. PETERSBURG, May 15.—Lieut. Gen. Sakharoff has sent the following report to the General Staff, dated Liao Yang, May 14: 'The enemy's advance guard on May 12 reached Touintsou, on the road between Feng Wang Cheng and Liao Yang. Our two sotnias of Cossacks retired.

"A Japanese force of three battalions of infantry, ten guns and two squadrons of cavalry was, on May 11, in Taffancon Valley. Since then there has been no news of the movements of the force, which leads to the conclusion that it has branched off westward

"A detachment of the Japanese vanguard left Touintsou May 13, southward, and was pursued by our Cossacks, who exchanged shots with the Japanese rear guard for half an hour and, having in the meantime discovered an ambush prepared by the Japanese, retired.

"Our scouts ascertained that a Japanese force of two regiments of infantry and cavalry had approached Erntaonfan. Our line of patrols between Lan Chan Hourn and Saimadza had a skirmish with Chinese bandits in which three Cossacks and horses were killed, three Cossacks slightly wounded and four missing.

NEWCHANG, May 15.—A band of brigands was attacked about a mile and a half southeast of this city last night by a num ber of native irregulars, the fight being witnessed by the correspondent of the Associated Press. Three of the brigands were killed and two mortally wounded by the natives, who were not assisted by the Russian troops

The Russians are offering splendid pay for natives as railroad guards, which would enable them to place more fighting men in the field, but the Chinese are not accepting the offer. A Chinese engineer reports thirty miles of the railroad

It is the general desire that Kouropatkin shall be the sole head of the military operations.

The troops then passed before the pavilion, in front of which they were afterward drawn up. The soldiers cheered lustily on the approach of the Emperor, who personally wished them Godapeed. If the Hearst people could have got an instructed delegation they would have let everything else go. With this plan aglow they are now lining up to contest every foot of ground. For district delegates the Hearst crowd are talking of Edelman and McCarthy, who both were beaten at the nelmander.

SACK HELD TOO TIGHT.

The Hearst fellows coming up on the train got hungry and McCarthy told ner when they got to Santa Cruz. But lunch? Fred Harkness was approached, but grunted out that he had done enough. At last he produced \$5 for lunch, for twenty-three people, as the Hearst men invited in the ahits. So Harkness got a tribute to his gameness. They say Fred is not opening the mouth of the sack wide enough. Neat things had been expected when he came to Los Angeles, leaving his oil wells in San Luis Obispo and opening the might as well have gone through the streets shaking the sack to make the coin jingle. There is a story that one patriotic and enthusiastic rooter who failed to get on the regulation ticket for the primaries offered one more lucky \$50 for this place. The price was \$100, so one is \$50 in, the other \$50 out. A free ride to Santa Cruz and back, \$5 for a lunch for twenty-three, is all there is in sight. The rank and file think the managers are sitting too tight on the sack.

It has not been the custom in this State and Tarpey is quoted it former conventions as strongly obposed to it. There is an air of decided anxiety on the faces of the Hearst rooters.

WHY TARPEY CAME BACK. An interesting story is told here today. Tarpey is the \$20,000 a year agent for the properties of the Hearst estate, which are in many places from Montana into Mexico. Tarpey seems to have been confident that the State would go for Hearst, so he started for Montana on business. It reached the ears of McNab that the Hearst outfit were claiming San Francisco under his (McNab's) leadership. He went to one of them and told him this was untrue. McNab said:

"I never deceive or mislead any man. I am against you. I advise you to send this world to Mr. Tarpey."

The word was sent and Tarpey came back in a hurry. The more he went over the ground the more he made up his mind to stay here.

STATE CONVENTION.

Followers of the Late Senator Hanna in the Majority-Herrick, Cox, Dick and Foraker Slated for Delegates-at-Large to National Convention—Harmony Programme.

(BY THE ASSOCIATED PRESS-P.M.)
COLUMBUS (O.) May 15.—The Re publican State convention meets here next Tuesday and Wednesday under new conditions. This is due to the loss of Senator Hanns, who had attended the gatherings for a score of years and had dominated them for the last decade. This year no one is supreme-ly master, and in place of Hanna there is a group of leaders.

There are \$51 degelates in the con-rention. A large majority is affiliated with what is called "The Old Hanna Guard," and there is no doubt about the convention being controlled by Gov. Herrick, George B. Cox and Sen-ator Dick, who, with Senator Fora-ker, will be the delegates-at-large to the Republican National Convention at

The principal contention is for continuance of control of the party organization, and it is conceded that Gov. Herrick, who was both permanent and temporary chairman of the convention, will be elected as the Ohio member of the National Committee, and that Senator Dick will be reelected chairman of the State Executive Committee, so that the old Hanna organization is assured of continuance. What is called the "Old Hanna Guard" will name the ticket, and the delegates, the latter including Senator Foraker, "for the sake of harmony and in deference to President Rooseveit." The "organization men" will write the platform. The only "free-for-all" races will be for alternates-at-large and minor places on the State ticket.

is threatened impairment of the beauty of Niagara Falls.

"However much we may discount and deprecate the interferences of the sentimental with the practical in life," the Governor says, "we cannot yet away from the fact that this sentiment is not one of retrogression, but of constant progression in civil life. There is due to it, therefore, the same consideration which should be given to all practical agiairs of life. This seems to be to be a second and fully as important point to object to approval of the measure.

"The Legislature should protect the falls rather than increase the menace by restricting those corporations which are already in possession, and by compelling the removal of obstructions and unsightly structures which mar the beauty of Niagara."

The German Foreign Office has been informed, according to assurances given to the Berlin correspondent of the Novoe Vremya, that China will not venture to infringe the neutrality, as owing to the distinct intimation from all the powers the dynasty would be jeopardized by such infringement.

It is believed that the Japanese would be embairsased by the open assistance of China since Europe would hold Japan responsible for the consequences. The correspondent asserts that the German Foreign Office inspired the United States to propose the neutralization of China.

nominational support, precisely as the Catholic University is doing its great work with notable and expanding success. A non-denominational university could have no school of theology, nor, in my apprehension, even a school of philosophy. It seems to me that the great church, to which I belong ought hence to realize the situation and remove this terrible handicap from tea American University. I do not believe the university will full if it is not done, but it will take many years more of hard effort to reach up to this necessary condition. The General Conference on trues, the Judgment and good sense of the trustees of the American University. What has been done under this great handicap ought to be an assurance, that the responsible officials of the university will do nothing that is not wise or that could possibly subject the church to any criticism. I beg you will give the matter such active support as in your good judgment is right, remembering that those of our people, and we on the board, who have labored with Bishop Hurst, and since, in accomplishing this great desire, have no motive and no interest in so doing except the purely disinterested one of bringing honor to the church and founding here a great seat of learning which will grow in value and importance as time goes on.

This is a critical hour: A vote of the General Conference leaving the whole question of opening the university to the board of trustees or at lessity putting the goal at not more than \$1.000,000, so that it will be within reach, will so encourage us all that success will be certain in the near future: A vote to continue the \$5,000,000 embargo will, I greatly fear, be all but fetal to the enterprise. A vote for permission to begin when we get \$1,000,000 is the short and direct road to the first million.

EFFORT TO SHOW THEY EXCEED THE CALIFORNIA TIMBER.

But, After All, Authority is Quoted Admitting that Both the Highest and Broadest Trees in the World Are Natives of the Golden

[J. H. Maiden, in the Sidney Morning Herald:] A great many tales about Australian vegetation have, from time to time, became current, only to become demolished as the continent became better known. there is one phase of the subject that is of real scientific interest—I allude to the size of our trees, and in regard to these we have still much to learn. It is very difficult for some people to understand that, in a question of this kind, only actual measurements, by tape or theodolite, or records by an observer of proved accuracy, can be admitted. The mere guessing of heights is rarely attended with even

off. and hus we have 420 feet as the height of this tree.

Henniker Heaton states that on the Blacks' Spur were two trees, one alive, measuring 420 feet in height, and the other (prostrate,) 480 feet high. He adds that Baron Mueller is the authority for these measurements. One version, therefore, states that the 420 feet tree is prostrate, and the other that it is alive. If these statements are correct, then two trees of this stupendous height are referred to. Following is another account of the 480 foot tree. A note by Mueller in the Gardener's Chronicle for 1862 says that several trees had been recently measured at the Upper Yarra and on the Dandenong. He adds: "The highest known is ascertained to be 480 feet, and therefore as high as the Great Pyramid." The same writer, in Seamann's Journal of Botany, says that it was a Mr. Klein who measured that it was a Mr. Klein who measured feet high. Mueller, in his "Select Ex-tra Tropical Plants," states that a tree was measured in the Cape Otway Ranges 415 feet high and 15 feet in diameter. Another tree measured at the base of the stem 69 feet in cir-

cumference at twelve feet from the ground, 14 feet in diameter; at 78 feet, 9 feet; at 144 feet, 8 feet in diamte and at 210 feet, 5 feet. All these on account of its crowning height. It as "white gum, messmate and peppermint" (it varies much in the bark,) and Mueller alludes to it as "the tailest tree of the globe, surpassing even he renowned California Sequola and GUM TREES 500 FEET.

On another occasion he continues Heyne measured a tree at the Dandenong 295 feet to the first branch, diameter at first branch, 4 feet. To
the point where broken off, 70 feet;
total, 365 feet. Diameter at fracture,
3 feet; girth of stem, 3 feet from
ground, 41 feet. Although not up to
the 400 feet standard, this is a very
big tree, and I am sorry that we have
not evidence which would warrant
our accepting it. In fact, these old
records are simply unreliable, in spite
of their apparent attention to details.
We will go a step higher. In 1889

of their apparent attention to details. We will go a step higher. In 1889 Hon. F. Stanley Dobson of Melbourne quoted Mueller as having stated in his "Botanic Teachings" that our gum trees attain a height of 500 feet. I cannot frace this particular reference, tut I have other references of such a height to which Mueller gave currency. For example, in Seemann's Journal of Botany, he states that George W. Rob-Botany, he states that deorge w. Rob-inson, in the back ranges of Berwick, found a tree 81 feet in girth 4 feet from the ground, and supposes that toward the sources of the Yarra and Latrobe rivers it attains 500

Another contemporary account says

feet.

Another contemporary account says that W. G. Robinson of Berwick, Victoria, in a journey from Gippsland to Mount Baw Baw, saw and measured a tree 500 feet high. Later, in an edition of the "Select Extra. Tropical Plants," the name of the finder and the height are varied. "G. W. Robinson, surveyor, measured a tree at the foot of Mount Baw Baw 471 feet high."

But we have not reached high-water mark yet. David Boyle, who for twenty-seven years had been identified with big trees, in 1889 wrote to the Melbourne Argus, giving 525 feet as the height of a tree known to him some years previously. As this was considered to be rather "tall," and is, I believe, the greatest height in or out of Australia claimed for a tree, Mr. Boyle replied to inquirers: "I determined to have it photographed and measured, ten years having elapsed since I measured it before.

I found it. The tree was healthy, the only change in it since I saw it last being that a portion of the top was blown away. The measurement now

is 466 feet high, and its circumference 4 feet from the ground, 81 feet, base 114 feet." Visitors to the Melbourne Interna-

tional Exhibition of 1888 will remem-ber the photographe of a large-bytted gum tree by N. J. Caire, photographer, who stated that he had come across this monster in Gippsland, and that its height was 464 feet. He called it "The Baron," after Von Mueller. Here was something very definite to go upon. The trustees of the public library, Melbourne, voted £109, the trustees of the Exhibition Building another £100 the Minister for Lands other £100, the Minister for Lands promised a sum not exceeding £800 to have this leviathan measured and photographed. After some hesitancy on the part of the photographer, the identical tree photographed was found. The inspector of forests and a government surveyor measured it accurately, and found it to be 219 feet accirately, and found it to be 219 feet of inches. Here was a come down. "No tree in the neighborhood reached 200 feet." The tree, of which a specific measurement was given, was found, on actual measurement, to be less than half its reputed height. Hon. James Munno, premier of Victoria, thereupon offered a reward of £100 out of his

admitted. The mere guessing of heights is rarely attended with even approximation to accuracy. I have been given the most astounding heachts for certain trees, and when I have asked for evidence I have sometimes given offense.

The kudos attaching to the ownership of the largeat (highest) tree in the world, is usually claimed for California and Australia. We will examine the evidence presently. It seems a pity that, years ago, before many of the giants were leveled for the necessities of civilization, scientific measurements were not obtained. There are, however, even yet, monarch of the foresta in regard of which these data should be collected.

The greatest claims for Australian trees have been made on behalf of Victoria, most of them from Gippsland. In 1862 Mueller wrote to Seemann's Journal of Botany that D. Boyle of Kunawading, near Melbourne, had measured a faillen tree in the recesses of the Dandenong and found it to be 420 feet. About the same time be wrote to the Australasian, giving more details about this tree, which was stated to be 332 feet long. He added thirty feet as a fair estimate of the length of the tree.

Henniker Heaton states that on the Height of this tree.

Henniker Heaton states that on the length of the tree. SOME TALL TREES. Some Tall Trees.
Stanley Dobson, who spent much time traing to get at the truth in regard to these trees, writing to the Royal Society of Tasmania, "believed" that the hignest found by a govern-

Baw Baw is 326 feet 1 inch, with a girth six feet from the ground of 25 feet 7 inches.

In May, 1889, the Bendigo Evening News gave the height of a tree at Thorpdale, Glippsland, as 320 feet, diameter 7 feet at a height of twelve feet above ground, and 3 feet 6 inches at 165 feet from the ground. One hindered and sixty-five feet of this barrel was split into pallags, and produced 6000 6-foot and 3600 five-foot pallings. Here we have a circumstantial account of a tree reputed to be over 200 feet high, but af the time I could get no confirmatory particulars.

Next to Victoria the largest Australian trees are claimed on behalf of Tasmania. In the first part of the letters of Quaker Missionary Black house three are some measurements of large stringy-back trees (eucalyptus obliqua) on the Kmu River. I content myself with quoting three. The first was forty-five feet in circumference; supposed to be upwards of 200 feet high. He measured near Hampshire Hills two trees that had been felled for splitting into rails, each 180 feet long.

Rev. T. J. Ewing in the year 1849 gave an account of even larger trees. The "swamp gum" is eucalyptus gumil, variety acervula. He wrote one fully forty feet in circumference: "The "swamp gum" is eucalyptus gumil, variety acervula. He wrote one fully forty feet in circumference in Tasmania measured a saasafras (Atherosperma fioschala) six feet round and 140 feet high. He after and about seventy feet high.

Rev. T. J. Ewing in the year 1849 gave an account of even larger trees. The "swamp gum" is eucalyptus giunil, variety acervula. He wrote "One, about forty yards from the biggest, was sixty feet at four feet rom the ground, and at 120 feet must have been fully forty feet in circumference; it was without buttresses, but went up one solid massive column, without the least symptom of deexy. A silver the least symptom of decay. A silver wattle was 120 feet high and six feet round, In fact, we named it the Vale-of-Glants, for puny indeed did men appear alongside the vegetable wonders. The largest we measured at three feet from the ground, lc2 feet in circumference, and at the ground 130 feet. We had no means of estimating its height, so dense was the neighboring forest, above which, however, its height so dense was the neighboring forest, above which, however, its hole swamp gum is still growing, and shows no signs of decay; it should be held sacred as the largest growing from the root to the first branch 220 feet, and the top measures sixty-four feet, in all 284 feet, without including the small top, decayel and gone, which would carry it much beyond

mental "Sliva of North America," by Professor Sargent, which is a work of the highest value. He says: The round is the highest value. He says: The round i pear alongside the vegetable wonders. The largest we measured at three feet from the ground, ic2 feet in cirfrom the root to the first branch 122 feet, and the top measures sixty-four feet, in all 284 feet, without including feet. In 1862, he, in Seemann's Journal of Botany, stated that E. B. Heyne measured a tree at the Dandenong 295 feet to the first branch, dinage is thirty-six feet, and the first branch 4 feet. To tranch twelve feet, giving an average of twenty-four feet. This would allow for the solid bole 10,120 feet in timber, without including any of the branches.

LADY FRANKLIN'S TREE In June, 1881, Mr. T. Stephens measured the trunk of a large tree which had gone by the name of Lady Franklin's tree, and which was prob-Franklin's tree, and which was probably identical with one of those described by Rev. T. J. Ewing. It had been hid an down in the gale of December. 26, 1880. The circumference of the trunk at the ground was about seventy feet. At twenty-six feet from the ground the circumference was twenty-seven feet, and at fifty six feet it was twenty-one feet. The total it was twenty-one feet. The total length of the stem to where it abruptly, being free from branches the abruptly, being free from branches the whole way, was 266 feet, and it was there nine feet round. Sixty or seventy feet was estimated by Mr. Stephens as the length of the broken-off portion, and this would bring the total height to 330 feet. Mr. Stephens adds, "It might have been much more." This total height is based for the most part on actual measurements, and I attach much importance to it. Following are the dimensions, of

In 1886 the late Mr. Perrin, then conservator of forests, Tasmania, reported that one fallen tree that he leasured near Geeveston, gave the fol lowing dimensions: 250 feet to the first limb, 300 feet to the junction of three limbs forming the head of the tree. 309 feet to the broken stem, which here gave a diameter of over two feet. The total height of the tree might fair-The total height of the free might fairly be placed at 330 feet. At eight feet from the ground the circumference was about forty feet. It seems to me that it has not been proved that the largest Victorian tree is larger than the largest Tasmanian ones.

Turning to Western Australia, Muler, in Seemann's Joursal of Botany, states that Mr. Pemberton Walcott meaured a karri (sucalyptus diversicolor) in one of the delightful glens of the Warren River, "where it rises to approximately 400 feet."

I do not reconcile these statements as to measurements and approximation. On another occasion, "Messra. Muir saw trees with stems 300 feet long up to the first branch, and I myself noticed many trees which approached to 440 feet in their total height. When closely growing the young trees may have a comparatively slender trunk, so much so that a tree 180 feet high may show a stem hardly over a foot in diamèter." These figures require verification.

Eucalyptus marginata, the Jarrah, or mahogany of Southwest Australia, is a smaller tree, yet if is said to attain a height of 260 feet (Brown in "Treatise on Tree Culture in South Australia,") and as circumference of thirty-two feet, (Mueller.)

CALIFORNIA'S BIG TREES.

As regards the American trees, I cannot do better than quote the monu-mental "Silva of North America," by

bulk.
Turning to Sequoia Wellingtonia, known in California as "Big. Speaking of the celebrated Calaveras trees, he says: "In the Calaveras grove there are three trees over 300 feet high, the tallest measuring 335 feet. The largest tree measured by Muir is standing in the King's River forest, and four feet above the ground has a diameter of thirty-five feet, eight inches inside the bark."

He also states Sequoia Wellingtonia is the largest inhabitant of the American forests, and the most massive-stemmed, although not the tallest tree in the world. In this passage he is not merely indicating that the redwood

aller.
Professor Sargent is an eminent authority on the subject of which he treats, and in view of the actual measurements that he presents, viz. 340 feet in height for a redwood and a girth round the trunk of 107 feet for its congener, the "Big Tree." I am of opinion that, so far as our knowledge goes at present, California is the home both of the tallest and of the proadest trees in the world. broadest trees in the world.

NATIONAL REUNION OF ELKS. NATIONAL REUNION OF ELKS.

ST. LOUIS, May 15.—The programme for the national reunion of the Elks to be held in Cincinnati, the week of July 18, has been completed. It provides for an elaborate series of entertainments covering a period of five days. The Grand Lodge of the order, which convenes during each reunion, is to be entertained Monday, the 18th, with an .xcursion on the Ohio River, ending at night, with a display of freworks on the banks of the river in which the Kentucky lodges will join with Cincinnati lodge. A feature of the programme will be a band contest for prizes.

ex-policeman, was assassinated at an early hour this morning as he was returning home. His body was riddled with bullets, and he died in his tracks. Ten bullets penetrated the murdered man's body. Although bloodhounds were put on the trail shortly after the murder occurred, no trace of the assassin has been found. The murder occurred on West Third -avenue, near South Water street.

Mrs. John Combs, who heard the shots, also heard the cry "You murdering blackguard," and thought the voice that of her husband, whose return home she was awaiting. Combs was later found at a bowling alley and placed under arrest.

Gregory recently had served on the Reno Detective Agency; and was one of the men accused by William Wardjon, the national committeeman of the United Mine Workers of America, with assaucting him on a Rio Grande train near Salida. Colo. recently.

REPLY TO LORD IVERCLYDE.

LONDON, May 15.—Herr Ballin, director-general of the Hamburg-American line, in a letter to the Times this morning, replies to the long letter from Lord Iverclyde, published May 11, in which his iordship defended the Cunard line against American and continental criticism on account of its contract with the Hungarian government. Lord Iverclyde contended that the bitterest opponent of the agreement was one of the German steamship lines whose efforts to monopolize the whole of the European immigration business, he said, had seriously impeded the business of the Cunard line. In his letter Herr Ballin says that he never knew why the Cunard line retired from the agreement entered into between British and continental lines, under which he latter renounced the Angio-Scandinavian immigrant traffic. Herr Ballin adds that he exhausted all means to conciliate the Cunard Company, and that he even offered to submit the difficulties between them to arbitration, but without avail. Therefore, he says, the Hamburger-American line had no alternative but to endeavor to secure a share of the Angio-Scandinavian traffic.

YELLOW FEVER IN MEXICO. CITY OF MEXICO. May 15.—The Superior Board of Health will enter at once upon an active campaign to prevent another outbreak of yellow fever on the lithmus of Tehuantepec, where a large number of Americans are engaged in managing plantations. The cost of this work will be \$100,000, which has been appropriated by the Federal government. One new case of yellow fever is reported at Vera Cruz. The local sanitary officers are disinfecting houses and making daily visits. Yellow fever has reappeared at Meridia where there are now eight patients at the hospital. But a short time ago the clitzens celebrated what was believed to be the end of yellow fever in that city. Energetic work continues.

MIDSHIPMAN DROWNED. ANNAPOLIS (Md.) May 15.—Midshipman Phillip Brittingham of Wheeling, W. Va., was drowned about two miles from the naval academy this afternoon. The young man left the dock in a sailing launch with four other cadets. The boat was without centerboard or air tanks, and being caught by a strong gust of wind capsized and sank immediately. The young men struggled in the water about twenty minutes before succor reached them. Brittingham sinking just before another academy boat containing several other midshipmen arrived.

"But though we have strong men in every department of Los Angeles, mercantile, professional and mechanical, yet I believe the gospel pulpit of this golden Southland, for its size, is the strongest in the world. Here, we do not have merely ministers, who will some day be great, but men, who have it aiready won their greatness and are of hational and international influence and fame. When I speak of the Los Angeles pulpit, I, of course, include that of Pasadens. These two cities are really one. In the Congregational church, we have that great man, who in his Brooklyn days, was the associate of my father, and the peer of his city colleagues, Lyman Abbott and Cupits, it is and Greag and Storrs and Charles Culbert Hall. I allude to R. R. Merewditt. We have also the two mental and physical and spiritual gianta, the two fews. Dr. Days. It is mard to say whom we love and admire the most, it for train, heavy with its human freight, dashes headong into midner, the father, or the son. But why trysto he separate the two. When you love one, you must love the other. In the Bapon. How the world, we have that great man, Robert Burdette, whose merry heart ion of the good like a medicine. His constant it and all the anarchism of modern doubt I bring you this morning the glad, wholesome and hopeful message of the New Testament that God lives and is our Father, and that Jesus Christ, His Son, is our Savièr and the surpression of the surpression of the surpression of the surpression of the formation of modern doubt I bring you this morning the glad, wholesome and hopeful manhood."

Presbyterian Church, we have that great man, and the dead for all-charry and the surpression of t

ands and tens of thousands to Christonever do I believe Whitfield, or Bishop Simpson, or Bishop Newman, had more gospel power over an audience than he has. We are apt to overpraise the dead and underpraise the diving. I would not do either today. I believe Matthew Simpson was among the greatest of preachers living or dead. I believe Robert McIntyre is just as great. The Methodist Church's episcopacy, needs more pulpit princes like Bishop Fowler. It needs just such a preaching giant, like Robert McIntyre. "A second reason why Robert McIntyre is fitted for this high office. He is a great church organizer. Go where you will and study—his past career, Denver, Chicago, anywhere, and all the churches he was pastor of became prosperous. When his personality was felt there was not only a living personality, but a power behind the throne which made others work. I tell you the Methodist episcopacy needs men who are in touch with men, and not as stoo often the case with our theological seminaries, where men are elected to teach others how to preach after "The third reason why Robert McIntyre ching."

churches he was pastor of became prosperous. When his personality was felt there was not only a living personality, but a power behind the throne which made others work. I tell you the Methodist episcopacy needs men who are in touch with men, and not as its too often the case with our theological seminaries, where men are elected to teach of thers how to preach after they themselves have made a failure of preaching.

"The hind reason why Robert McIntry should be elected to the episcopation of preaching and has not an atom of jesiousy in his his make-up. He was my father's friend. He is now my friend. Not in the sense that he patronizingly pats me upon the back, but because he has and is inspiring me continually to do better work.

"I bear this simple testimony to Robert McIntyre's life. I would have his own denominational ministers not love him more, but know how all Presbyterians think of their giant, who is preaching upon this western coast. We would give him up to his larger field of work at a great personal loss. No minister-holds a greater influence for good in this city than does he. But if we should give him up we would surrender him in the same spirit as a mother would let her boy go to the war for his country's good. May God bless Robert McIntyre's life, whether he becomes Bishop McIntyre, or still continues to be the first preacher in this city of great preachers."

qualities of taffeta silk at 65c a yard!

19-inch width, beautifully finished skirts-just the sorts for waists, skirts, dresses and foundations. Colors-gold brown, marine and royal blue, champagne, 3 shades of grey, castor, light blue, maize, pink, Nile, turquoise, heliotrope, ivory, white, black and the new purple tints.

But the price holds good for today and tomorrow onlydon't forget that.

# Dress goods Third or more off

If they were OLD stuffs it wouldn't be surprising-but they are the very fabrics well-informed women are looking for. Trade conditions in New York may be thanked for this money saving chance.

75c, instead of \$1.25 to \$1.75 | \$1.00, instead of \$1.50. Crepes, Etamines, Volles, Eoliennes and silk-and-wool mixtures newest weaves and colorings for summer gowns. Many of them worth more than double.

50-igeh Scotch and English suitings in Herringbone and fancy mixed effects, invisible stripes and plaids—decidedly smart stuffs for tailor suits and separate skirts.

36-inch mercerized Bengaline moreens in all colors-sold everywhere at 50c a yard-here at 35c.

# Underskirts A special showing

Today and tomorrow we shall display the greatest gathering of really FINE underskirts we've ever had at the price—\$8.

Mind you, we say FINE skirts—and everyone knows what They'd be generously good values at \$3.50, \$3.75 and \$4-

the regular prices. Ten styles to select from-all of fine soft cambric, beau-

tifully trimmed with embroideries and laces.

A descriptive word of one style: Skirt of Jones' cambric, with 24-inch lawn flounce, 3 rows of fine tucks and 8 rows of imitation Duchesse lace, edging. Our regular \$4 quality, at \$3.

Complete assortments of the famed

SPECIAL CORRESPONDENCE OF THE TIMES. PHOENIX (Aris.) May 14.—Oscar Rogers, just released from the Territorial penitentiary under pardon from Gov. Brodle, is considered by the prison officials one of the most remarkable men ever in the institution. In 1893, while employed as a piano player in one of the Phoenix gambling houses, he plotted with Frank Armer, a Tonto Basin cowboy, to rob

ACQUITTED OF MURDER After deliberating for twenty-three hours, a verdict of not guilty was returned by the jury in the murder case against Josiah Anderson. It was Anderson's second trial for the same offense. He had been given a sentence of five years and had served ten months in the penitentiary when his lawyers succeeded in securing a new trial order from the Supreme Court of the Territory. The victim in the case was a cowboy named Cameron, with whom the defendant had had trouble over catific. Against Anderson was an ugly record, embracing a term in the penitentiary for grand larceny.

MILES OF MELONS

With an ample supply of pumped water, giving assurance of irrigation necessary, there appears no water, giving assurance of irrigation whenever necessary, there appears no doubt of the success of the 600-acre melon farm, near Kyrene station, south of Tempe. The enterprise is of such magnitude as to necessitate the building of a three-mile spur of the Maricopa and Phoenix Railway, and the erection on the ranch of an independent ice factory and cold-storage warehouse. Solid melon trains are to be run as far east as New York.

"Then they began wrifting me letters, and as I secured those letters day after day I thought. I have no use for your doctrines, but I admire your zeal.

"If we as Christians had such as all thould not be long ere the whole world would be brought to Christ." Brothers, sisters, let not a day pass without doing your best to bring at least one soul to God.

"Don't reach out for a big thing. Be willing to do a small thing for Christ. That is the secret of success."

Dr. Mortison then made a short but forceful talk.

"There is epiritual power in the air here;" said he. "Let us exercise a faith in Him that will bring the rain down upon us. Then your lips will be loosened and you will be surprised to see how eloquent you will become and souls will listen and come to Christ like dust to the windows.

"Before God let us pledge ourselves that we will go out and win souls for Jesus."

Craven was located in the Rose-street house yesterday afternoon by Detective Murphy, but when the efficer knocked at his room, E. L. Simmons, the Jailbird's room mate, delayed opening the door until Craven had escaped through the rear of the house. Murphy quickly gave chase and Craven took refuge behind a thick row of cypress bushes alongside a high fence. Then the fun began. Murphy chased his man up and down the hedge row until both men were exhausted. Detectives Smith and Davis came up later and Craven deserted his place of shelter and tried to hide in the basement, but was quickly caught. Simmons was also arrested and is being beld on suspicion.

yesterday and is now held pending the arrival of her father.

The little girl slowed herself away on a Southern Pacific train and arrived in Los Angeles about neon Saturday. The parents had asked the police to look out for the diminutive runaway, and she was seen at the Arcade Depot, but gave another name and escaped detection. She made her way to the home of Mrs. Irene Highworen at the home of Mrs. Irene Hirigoyen, at the corner of Wabash and Dobinson streets, and remained there until yeakerday after ternoon, when she was taken in charge by Officer Hellman, who delivered her to the matron at the City Jail.

Willie, "borrowed" a horse and buggy belonging to a Riverside colored man named Brightwell. The pair started out to run away, but the horse was struck and killed by a Southern Pacific reeight train, the children barely escaping by jumping from the buggy. The boy was sent to the reform school the following day, and the little sister says she ran away from home to try to find the brother. The patents of the runaway child formerly lived near the home of Mrs. Hirigoyen, and the members of the latter's family were the only people in Los Angeles she knew. Owls, 4: Modern Woodmen, 0.
Tutts-Lyon, 3: Hamburgers, 2.
The City League entertained itself yesterday at Chutes Park with a double-header that furnished all kinds of baseball that one would care to see for the price of one admission. There was almost every kind of hit, error and wild throw that could be imagined; the umpife was warmly reasted at times; and two Owl players knocked each other out trying to catch the same ball, and there were some fearfully good spasms and some very bad ones. The day was certainly a full one and the fans doubtless got their money's worth.

There have been some attempts to discover its real extent lately, but I am informed that, after tiring themselves out in walking about the gigantic chambers, the explorers gave the trip up in a few hours, saying that they had just begun to see what it looked like.

"Fabulous stories are told as to the extent of the chambers. One man stated that there was a large room in the cave, in which the Cathedral of the City of Mexico could be placed and still have considerable room for other buildings of the capital.

"It is also sold that the roof of the chamber is so high that a rocket, which was sent up several hundred feet, failed to reach the top of its dome. There are immense stalagmits roses of limestone crystals which are about twenty feet across and immense formations resembling colossal palm trees more than a hundred feet tall are also found.—[Mexican Herald.]

oldest Bell in the United States.

The oldest bell in the United States has just been acquired by Gov. M. A. Otero and will be exhibited in the New Mexico building at St. Louis. The history of the bell is interesting, the data being furnished by Father Coudert of Bernallilo.

The bell was brought from Spain on one of the first expeditions to Mexico by Father Juan de Padilla, one of the Franciscan fathers, who accompanied Coronado to New Mexico. It was hung in one of the mission churches established in one of the seven citles of Cibolla. From there it was taken to Gran Quivera, where it was taken to Aigodones, where it has hung in the parish church ever since. Father Padilla was killed by his guides while onthe way from Gran Quivera to Algodones.

Next Saturday afternoon One Thousand People will visit MANHATTAN BEACH as our guests. We have room for them as residents and investors.

TO SEE WILL BE TO BUY. We want them to see our Beach. They cannot help buying when they see it.

The LOS ANGELES TIMES, in an editorial on the Hoese and Los page of April 24, 1904, said: "One of the most notable features about the real estate business during the past couple of years has been the wonderful development of settlements. Investors are beginning to realize the truth of what the TIMES has frequently stated, that while business sections and residence sections may be extended almost indefinitely, there are only just so many feet of ocean frontage, and there will never be any more."

That is why property at the older beaches sells for \$500 per front foot. It will sell for this price at Manhattan before long. You cannot put money into a safer spot than at Manhattan.

Now we invite all who have a little money to invest to call at our office, 531-532 Douglas Building, and get a free round trip ticket

Manhattan is straight down Grand Avenue, and is only 12 miles from 30th Street. It is three miles north of Redondo. It is unsurpassed for beauty of location. But we shall say no more. Go and see for yourselves.

These free tickets are for adults only and intended for possible investors. Mr. Ben Rhoades, known as "Affable Ben," will conduct a public sale for

He will treat you courteously whether you buy or not.

Two special trains will leave the Santa Fe Depot at 1:30 p. m. sharp, next Saturday, May 21, and returning will leave Manhattan at 5:30 p. m., reaching Los Angeles at 6 p. m. Call early, as many have been disappointed on our previous excursions. We shall give away only 1000 tickets.

DISEASES OF THE EYE.

Dr. Rams will give sight to those that were born blind. He will restore sight to those who are totally blind. He will implant glass eyes that have every movement of the natural eye. He will make artificial pupils through which the patient can read the finest print.

He will make artificial pupils through which the patient can read the finest print.

His methods of removing cataracts and sterygiums, straightening crosseyes and all other surgical diseases of the eye are his own, and unknown to the average specialist. All errors of refraction, such as far-sightedness, near-sightedness, astigmatism and double vision accurately corrected.

Rama offers a treatment that is not experimental, but one that has proved wonderfully successful. He offers treatment based upon the latest scientific and medicinal authorfiles of this country and Europe, combined with oriental practice of medicine and healing. He does not resort to the methods of floating quacks and kinerant venders of bottled herbs and roots, who are commonly classed as fakers.

BLOOD POISON.

Specific Blood Poison was for ages supposed to be incurable. This ancient idea still exists in the minds of many physicians, who continue to salivate their patients, with potash, mercury and other dangerous mixtures, which instead of forcing the disease out of the system, drive it deeper in, where it lies dormant for a time and then breaks out again in the form of some frightful skin, blood or bone disease. We cure Specific Blood Poison to stay cured forever. We challenge the medical world for a case in any stage that we cannot positively cure, never to return. Our treatment for this disease is indorsed by the best physicians of America and Europe.

NERVOUS DEBILITY.

Men, many of you are now reaping the result of your former folly, and you will soon be lost unless you do something for yourself. There is no time to lose. Nervous debility, like all vital diseases, is never on the standstill. With it you can make no compromise. Either you must master it or it will master you and fill your whole future with misery and indescribable woe. We have treated so many cases of this kind we are as familiar with them as you are with the very daylight. Once cured by its you will never again be bothered with nervousness, falling memory, loss of ambition, or other symptoms which rob you of your manhood, and absolutely unfit you for study, business or pleasure. Our treatment will correct all of these evils and restore you to what nature intended—a hale, healthy, happy man, with physical and mental powers complete.

ASSOCIATED DISEASES.
In curing a disease of any kind we never fail to remove all reflex complications. If the case is Varicocele, the weakness caused by it disappears. If the disease has developed into Prostatic, Bladder or Kidney affections, the injured organs are all restored to a perfectly healthy condition. If it is Contagious Blood Poison, any and all Skin and Blood diseases arising from the taint are entirely and permanently eliminated from the system of the physicians of the Rama Institute possess rare and exceptional skill.

SAME BURGLAR VHO ESCAPED FROM HIM THURSDAY.

Down After Being Taken in Act of Burglarizing the Travelers' Inn, Arrested Last Night as He Was Robbing a Drunken Man.

The burgiar that escaped from Officer Walsh early Thursday morning after being captured, while in the act of burgiarizing the Travelers' Inn saloon, was caught in the act of robbing William Jackson, a brickýard employé, near the corner of First and Vine streets last night about 8:20 o'clock. Walsh made the arrest and this time the officer did not forget to handcuff his man, who is now safe in the City Jail. J. D. Duncan is the name of the Jail. J. D. Duncan is the name of the burglar and hold-up man; and a part-ner in crime, Bob Bolen by name, was also landed at the same time. Dun-
